

SUMMARY OF USE OF RESULTS

DEGREE PROGRAM: _____ GENERAL EDUCATION _____

ASSESSMENT CYCLE: _____ 2019-2020 _____

QUESTION 1

As a result of data analysis and program evaluation, discuss where students are performing at the highest and what this means for the program.

With Covid-19 this year, we were not able to offer the CAT exam or give the Student Impressions Survey. Also, since we were using new rubrics for four of five major areas assessed, we do not have year-on-year comparison data in those areas. In the one area that did have year on year data, we did see student learning outcomes increase.

The Christian Worldview Assessment shows an increase in three of four areas assessed.

- Comparison to Last Year

	2018-19	2019-2020
Recognition and understanding	68.14%	76.93%
Articulation	66.13%	71.45%
Assessment and Analysis	70.35%	71.15%
Application and Demonstration	68.44%	67.57%

QUESTION 2

As a result of data analysis and program evaluation, discuss opportunities for improvement and describe the planned changes that will be implemented in an effort to improve the program.

Between the use of new rubrics (We set benchmarks this year) and the lack of data caused by Covid-19 (not being able to give the student impressions survey and the CAT test), we do not have much data that shows improvement or regression in student learning. The one area we did have data for showed improvement.
